What is it?

Situational Leadership® II or **SLII®**, is the most comprehensive, up-to-date, and practical method for effectively managing and developing people in the world. It is a prime enabler for developing an organizational culture focused on High Performance. It is a model and at the same time a tool-box for:

- Developing high achievers, individuals with high productivity and commitment;
- Opening-up communications focused on performance;
- Honor difference and leverage it to the benefit of the organization;
- Connecting different leadership elements: task giving, developing, motivating and monitoring.

To whom it is addressed?

To managers and supervisors at all levels

Which skills will you develop?

Participants will develop the following skills:

- Diagnose correctly what their people need in order to achieve any given goal or complete any given task;
- Choose and use comfortably the right leadership style, i.e. the way of giving tasks that matches assessed development levels;
- Conduct effective one-on-one discussions, focused on the performance of their people and their needs, to help them accomplish agreed goals.

Demonstration of the above skills at the work place will result in the following outcomes:

- Increase in the productivity and the engagement of people;
- Development of a strong "bench", individuals ready to take on successfully more responsibilities;
- Freeing supervisors time from extinguishing the day-to-day "fires" so that they can focus more on a better tomorrow, shifting their time from tactics to strategies;
